

# Join Elettricità Futura

*The leading industry association representing  
**70%** of the Italian electricity market.*

**More than 500 companies active in the production,  
distribution, trading of electricity and industry services,  
have chosen Elettricità Futura to grow further.**

**elettricitafutura.it**

## Our **Vision**

Elettricità Futura aims to promote the development of the Italian electricity sector towards the energy transition. This is a path to revitalize the industrial supply chain and to enable the creation of significant benefits for the economy and employment by increasing the security, independence, sustainability and competitiveness of Italy.

# Our Activity

**WE REPRESENT** companies in the electricity sector by constantly engaging with national, regional and European institutions, Authorities and technical Bodies.

**WE PROPOSE** concrete actions for the enterprises to grow further and for the development of the electricity sector, bringing the proposals of our Associates to decision- making tables.

**WE ASSIST** businesses by providing constant updates on relevant industry matters and timely information to address individual needs.

**WE PROMOTE** the dissemination of the culture of energy transition, sustainable innovation and the values of the electric sector companies, through our studies, events, training and incisive communication activities.

**WE ENGAGE** member companies by fostering networking and providing opportunities for dialogue and information sharing at our working tables.

**WE NEGOTIATE** and sign the National Collective Bargaining Agreement of the electricity sector with the trade unions and provide assistance to companies in its application.

Elettricità Futura is a member of Confindustria,  
Confindustria Energia and adheres to the leading  
European electricity industry Associations.
